		Read the following passage and answer the question that follows:					
		Driving etiquette is a civilized driving behavior comprising observance of rules and propriety. Certain statutory obligations have to be observed. While driving a vehicle, it is absolutely essential that all documents connected with ownership of the vehicles, driving license, pollution-free certificate in original, etc. are kept in the car. They have to be produced on demand by the competent authority. When the person driving a vehicle is still a learner, the broad "L" should be prominently displayed.					
		Parking vehicles on the side of the road is a common feature because of paucity of space. Technically, this is illegal as per the Indian Motor Vehicle Act, but the rule is not enforced strictly. To caution pedestrian or a slow moving vehicle in front of us, sounding the horn is essential. We are bound to do it legally as well but we should					

		not honk unnecessarily, creating sound pollution. Basic human dignity is more important than strict observance of rules. At crossroads, those who come from our right path always have precedence. We should give hand signals for those who follow us, particularly when we slow down, take sudden turn or overtake a vehicle. Never take a vehicle from wrong side even if there is space. When another driver makes a mistake try to correct him if time permits, instead of abusing him or threatening him with dire consequences.

Read the following passage and answer the questions that follow: Indian cultural history spans more than 4,500 years. During the Vedic period (c. 1700-500 BCE), the foundations of Hindu philosophy, mythology, and literature were laid, and many beliefs and practices which still exist today, such as dharma, karma, yoga, and moksha, were established. India is notable for its religious diversity, with Hinduism, Sikhism, Islam, Christianity, and Jainism among the nation's major religions. The predominant religion, Hinduism, has been shaped by various historical schools of thought, including those of the Upanishads, the Yoga Sutras, the Bhakti movement, and the Buddhist philosophy.					
Much of Indian architecture, including the Taj Mahal, other works of Mughal architecture and the architecture from south India blends ancient local traditions with the style of foreign influence. Vernacular architecture is also highly regional in its flavors. Vastu shastra, meaning "science of construction" or "architecture" and ascribed to Mamuni Mayan, explores how the laws of nature affect human dwellings; it employs precise geometry and directional alignments to reflect perceived cosmic constructs. As applied in Hindu temple architecture, it is influenced by the Shilpa Shastras, a series of foundational texts whose basic mythological form is the Vastu-Purusha mandala, a square that embodied the "absolute". The Taj					

		Mahal, built in Agra between 1631 and 1648 by the orders of Emperor Shah Jahan in memory of his wife, has been described in the UNESCO World Heritage List as "the jewel of Muslim art in India and one of the universally admired masterpieces of the world's heritage."
